AUSTRALIAN OFFICE MARKETS

Sydney CBD weak demand matched by low supply

Sydney CBD office market

- Demand from banking sector will be subdued through FY13, however business services will continue to grow
- Incentives likely to remain elevated and effective rent growth mild in FY13 due to contiguous space options and backfill space from pre-committed towers (8 Chifley and 161 Castlereagh Street)

AUSTRALIAN OFFICE MARKETS

Barangaroo impact on the Sydney CBD office market

Barangaroo to have long term positive impact on Sydney CBD

- Expected to deliver circa 266,000sqm of office space, representing 31% of the forecast gross Sydney CBD supply over the next decade
- Movement of pre-committing tenants will create backfill space from 2015, however much of the Westpac space is secondary stock and may be withdrawn for refurbishment or redevelopment
- The project comprises circa 5% of total CBD stock spread over two years. Assuming average take-up of 1.4% of stock p.a., impact on market vacancy could be in the vicinity of 2% to 3% in 2015-2017
- Net face rents reported to be in the \$900-\$1100/sqm range, well above the average for the western corridor precinct
- We anticipate a competitive leasing market

Impact on western corridor precinct

- Project and associated infrastructure will improve amenity
- New benchmark for rental levels
- Backfill space will enter the market

Impact on DEXUS

- Increased demand from tenants seeking to locate between Barangaroo and Wynyard station
- Longer term opportunity for rents in the western corridor precinct properties to rebase higher

GLOSSARY

Constant currency:	Items shown at constant currency for June 11 have been restated using the June 12 average FX rates for comparative purposes.
Distribution payout policy:	For FY12 the distribution paid will be 70% of Funds From Operations (FFO). Commencing FY13 the distribution paid will be a range of between 70-80% of FFO.
Funds From Operations (FFO):	Funds From Operations (FFO) is often used as a measure of real estate operating performance after finance costs and taxes. DXS's FFO comprises profit/loss after tax attributable to stapled security holders measured under Australian Accounting Standards and adjusted for: property revaluations, impairments, derivative and FX mark to market impacts, amortisation of certain tenant incentives, gain/loss on sale of certain assets, straight-line rent adjustments, deferred tax expense/benefit and DEXUS RENTS Trust capital distribution.
Gearing:	Gearing is represented by Interest Bearing Liabilities (excluding deferred borrowing costs and including the fair value of cross currency swaps) less cash divided by Total Tangible Assets (excluding derivatives and deferred tax assets) less cash. Covenant gearing is the same definition but not adjusted for cash.
Non-cash items:	Includes property revaluations, impairment of goodwill, derivative MTM, gain on sale and deferred tax.
Operating EBIT:	Comprises net operating income, management EBIT and other income less Responsible Entity fees and other expenses paid.
Portfolio value:	Unless otherwise stated, portfolio value is represented by investment properties, development properties and investments accounted for using the equity method, and excludes cash and other assets.
Responsible Entity fees:	In this presentation Responsible Entity fees are shown at cost following internalisation in Feb 08. This Responsible Entity fee expense and the corresponding management fee revenue are eliminated in the statutory financial statements as the management business is a wholly owned consolidated entity.
Securities on issue:	FFO per security is based on the average weighted units on issue prior to the Theoretical Ex-Rights Price (TERP) adjustment. In accordance with AASB133 the weighted average number of securities for earnings (EPS) purposes is adjusted by a factor equal to the security price immediately prior to issue divided by the TERP.
Weighted Average Lease Expiry (WALE):	A measure, in years, of the average term to expiry of in-place rent. Includes vacancies.
