- Over the next two years, Australian cities are set to continue to benefit from global economic growth, population growth and infrastructure activity
- We expect to see support for real estate values over the next 12 months within our core markets
- Dexus is well positioned to improve performance across a number of areas in the underlying business
- Upgraded market guidance<sup>1</sup> for distribution per security growth to 4.5-5.0% from 4.0-4.5% for the 12 months ending 30 June 2018
- Recent volatility in equity markets, has resulted in Dexus announcing plans to initiate an on-market securities buy-back of up to 5% of Dexus securities on issue, providing the opportunity to enhance investor returns

Barring unforeseen circumstances guidance is supported by the following assumptions: Impacts of announced divestments and acquisitions; underlying FFO per security growth of 2.5-3.0% underpinned by Dexus office portfolio like-for-like growth of 4.4%, management of a c \$50 million and cost of debt in line with FY17 trading profits of \$35-40 million red of tax; maintenance capex, cash incentives, leasing costs and rent free incentives of \$165-170 million; and excluding any further transactions. Adjusted of the one-for-six security consolidation completed in FY15. Compound annual growth rate (CAGR) is calculated over six years, assuming mid-point of FY18 guidance is met.
