MARKET OUTLOOK

Office markets subdued in FY14 with upside in demand FY15

- Leasing enquiry and net absorption subdued, tenants taking longer to make decisions
- Vacancy rates have risen
- Supply is expected to be low in FY14 and FY15 (excluding Melbourne)
- Rents are likely to ease in FY14 with incentives increasing to secure quality tenants
- In Sydney, Brisbane and Perth a low construction pipeline in FY14 will limit movement in vacancy
- In Melbourne, above average levels of supply will lead to elevated vacancy in FY14 before improving
- Demand to improve in FY15

MARKET OUTLOOK

Why office demand will improve

- Periods of subdued office demand are a recurring feature of the office market cycle
- Demand will improve due to
 - Easing monetary policy and lower AUD stimulating confidence, economic growth, credit growth and revenues
 - Past productivity measures will help profits
 - Recovery in employment to be led by business services, accounting, legal, IT, health, education, finance
 - More moderate growth than over the past decade
 - More flexible workplaces a key theme over the next decade, embedded in view

Employment growth by industry

National whitecollar employment and office demand

Source: Jones Lang LaSalle, DEXUS Research, Deloitte Access Economics June 2013.

MARKET OUTLOOK

Two tier office market emerging with tenants favouring prime stock

- Prime vacancy is lower than secondary
- Tenants are migrating from poorer quality space to better quality space
- Two tier market most pronounced in Melbourne and Brisbane
- Perth and Sydney to follow as prime space leases up and secondary market weakens

Trend in prime and secondary vacancy (four CBD's)

Prime and secondary vacancy June quarter 2013

MARKET OUTLOOK

Industrial markets maintain good occupancy

- Demand in the industrial sector constrained
- Should improve late FY14 and FY15
- Demand to be driven by tenants relocating and seeking improved efficiencies and infrastructure investment esp. logistics and retail
- Occupancy rates high – limited availability of prime space
- Rents flat/easing in FY14, eventual upside in medium term due to increasing development costs
- Investor demand for industrial assets remains strong, however prime stock is limited
- Total return supported by high income yield
- Melbourne very competitive; Sydney subdued but stable; Brisbane has paused but has good medium term prospects

Consumption - to drive rental growth

National prime vacancy remains low

SUMMARY

SUMMARY

Investment in Commonwealth Property Office Fund

On 25 July 2013, DEXUS entered into a forward contract to acquire a 14.9% interest in Commonwealth Property Office Fund (ASX: CPA)

- 350 million CPA units at \$1.1334 per unit
- Efficient off balance sheet funding structure
- Accretive to earnings
- Investment consistent with DEXUS's strategy of investing in high quality Australian office
- DEXUS has no current intention to make a take-over offer for CPA, however reserves its rights to change that intention in the future

Grosvenor Place, 225 George Street, Sydney NSW

SUMMARY

- Enhanced the quality and diversity of portfolio
- Market conditions remain uncertain
- Experienced office management team with strong corporate and leasing backgrounds will continue to drive high performance
- Market guidance for FY14¹
 - FFO per security 8.15 cents, representing 5.2% growth
 - Distribution per security 6.12 cents

1 Bligh Street, Sydney, NSW

1. Barring unforeseen circumstances. Assumptions include: 75% payout ratio, delivering circa 4% like-for-like income growth in the office portfolio, \$4-5m in trading profits, cost of debt at 6.0% and excluding further on-market buy-back.

1. Used to calculate FFO per security.
2. Used to calculate distributions per security.

GLOSSARY

Distribution payout policy:	For FY13 the distribution paid will be at 77.4% of Funds From Operations (FFO) in line with the current payout ratio policy of between 70-80% of FFO.
Funds From Operations (FFO):	Funds From Operations (FFO) is often used as a measure of real estate operating performance after finance costs and taxes. DXS's FFO comprises net profit/loss after tax attributable to stapled security holders calculated in accordance with Australian Accounting Standards and adjusted for: property revaluations, impairments, derivative and FX mark to market impacts, amortisation of certain tenant incentives, gain/loss on sale of certain assets, straight-line rent adjustments, deferred tax expense/benefit, rental guarantees and coupon income.
Gearing:	Gearing is represented by Interest Bearing Liabilities (excluding deferred borrowing costs and including the fair value of cross currency swaps) less cash divided by Total Tangible Assets (excluding derivatives and deferred tax assets) less cash. Covenant gearing is the same definition but not adjusted for cash.
Non-cash items:	Includes property revaluations, impairment of goodwill, derivative MTM, gain/loss on sale and deferred tax.
Operating EBIT:	Comprises net operating income, management EBIT and other income less Responsible Entity fees and other expenses paid.
Portfolio value:	Unless otherwise stated, portfolio value is represented by investment properties, inventories and investments accounted for using the equity method, and excludes cash and other assets.
Responsible Entity fees:	In this presentation Responsible Entity fees are shown at cost following internalisation in Feb 08. This Responsible Entity fee expense and the corresponding management fee revenue are eliminated in the statutory financial statements as the management business is a wholly owned consolidated entity.
Securities on issue:	FFO per security is based on the average weighted units on issue prior to the Theoretical Ex-Rights Price (TERP) adjustment. In accordance with AASB133 the weighted average number of securities for earnings (EPS) purposes is adjusted by a factor equal to the security price immediately prior to issue divided by the TERP.
Weighted Average Lease Expiry (WALE):	A measure in years of the average term to expiry of in-place rent. Includes vacancies.
