Fund in Focus

Bond One, NSW

One of Australia's premier commercial real estate funds for direct investors

When it launched in 1985, the Dexus Wholesale Australian Property Fund (DWAPF) had a simple objective; to provide investors with reliable income and attractive long-term capital growth from a high-quality commercial property portfolio.

Risks

All investing involves risk, and you should consider investment risks before making an investment decision. The risks specific to the Fund may include or be associated with:

Property investments

Factors such as investor demand for property, the demand by tenants for commercial space, rental income levels, tenants' ability to service rental payments, the supply of new commercial space, capital expenditure and ongoing expenses for maintenance and repairs may affect the Fund's performance.

Liquidity

Assets subject to liquidity risk may be difficult to trade and it may take longer for their full value to be realised, and in circumstances where the Fund's portfolio ceases to be 'liquid' for Corporations Act purposes, there may be significant delays or a freeze on withdrawal requests. Market conditions may adversely impact the liquidity of assets held in a fund portfolio.

Interest rates

Including the risk of capital loss in a rising interest rate environment.

Gearing

Has the effect of magnifying the Fund's returns, both positive and negative. The Funds gearing range is 0-45% with long-term target of 0-15% of gross assets. The current gearing is 37.5%.

Derivatives

The use of derivatives may magnify any losses incurred.

Market risk

Certain events may have a negative effect on the economies and financial markets worldwide or in specific countries or regions which may negatively affect the value of investments including the Fund's investments.
